

RFID Card Reader for HID Cards

The NAC-8010AR is a RFID card reader for HID cards. HID cards are used in conjunction with an access card reader, also known as a HID card reader. In most cases, the reader is positioned close to an access point and is set up to provide access when a HID card is brought close to the reader.

Application

Communities, enterprises, hotels, factory, villas, schools and so on.

Features

- Fast reading speed
- Anti-crash circuit design
- Anti-surge
- Anti-misconnection protection
- Resin sealant and strong sealing type
- Wiring method inline with international standards
- Suitable for indoor and outdoor use

Technical Parameters

Card Type	1326 PROXCARD II ID Card
Panel Material	Flame retardant PC
Frequency	125KHz
Input voltage	DC 12V
Output Protocol	WG26/34
Reading Distance	3-7 cm
Operating Temperature	-20°C~70°C
Environment Humidity	20%~90%
