

Outdoor Column Speaker with 2-Way Driver 40W

DESCRIPTION

The NVS-10870040BS is a 2-way driver outdoor Column Speaker with built-in 70V/100V transformer. The transformer technique decreases line losses over longer distances and allows several loudspeakers to be connected in parallel. The built-in 4"x4, 2.5"x1 five-way speaker drivers provide a wide frequency response of 140-14kHz and a power output of 40W, which may fulfil a variety of applications depending on room size and ambient noise levels. The mounting hook allows for a simple and secure wall mount. It's an excellent choice for industrial and commercial applications such as hotels, schools, offices, restaurants, and factories where background music and paging is needed.

FEATURES

- ⦿ High sensitivity and high dynamic range.
