

Active Wall mount Speaker Pair 2x30W

DESCRIPTION

The NVS-11160030MS is a multifunctional high fidelity Active type wall mount speaker. The equipment comprises a main box and an auxiliary box, with the black color, making installation convenient. The machine routes remote audio data through its output audio signal, and the sound is directly emitted from the speakers. The auxiliary audio output interface allows connection to other power amplifiers to enhance power capacity. Additionally, there are two input interfaces for wired microphones, which enable superb voice reproduction and allow adjustment of input signals with high and low gain settings. The machine also offers various other interface options for users to select from.

FEATURES

- ⦿ Good sound quality and inverse-phase type design.
- ⦿ high pitch and low pitch double unit.
- ⦿ Strong input with power rating of 2x30W.
- ⦿ Possible to adjust the output volume of the speaker.
- ⦿ Auxiliary input, and priority input function such as AUX1,AUX2
- ⦿ With priority for MIC strong interpolation.
- ⦿ Can adjust the high and low pitch raise of input signal.

Specifications
