NVS-IP20024IC

Wall Mount Audio Intercom

DESCRIPTION

NVS-IP20024IC is a SIP intercom terminal which developed on the technical basis of VOIP phone and the needs of users. The voice transmission is under the standard IP/RTP protocol, which can be perfectly compatible with all the mainstream IP PBX/ soft exchange /IMS platforms based on SIP, which brings convenience for system configuration. The housing of the product is made of high strength aluminum alloy material, and the bottom shell is made of iron. This product is waterproof and dustproof, with IP54 Protection. The housing is firmly fixed by hex screws, which can effectively prevent dust and reduce damage caused by the impact of hard objects. It is a trust-worthy intercom product for users.

FEATURES

◉ Support POE power supply

◉ Comply IP54

◉ Editable call button

◉ External active speaker output interface

◉ 2 SIP lines

◉ Wall-mounted installation

Specifications
