

IP Based Power Amplifier 360W

DESCRIPTION

The NVS-IP100008AM is an IP based Power amplifier with 1U rack design and oxidized aluminum alloy panel which is beautiful and durable. It has a simple industrial humanization design which displays status signal in the front panel, all of the switches and volume knobs are placed in the back panel to reduce the unprofessional operation. It is integrated with front signal input interfaces of 1×Mic Input, 2×Auxiliary Line Input, 1×Network Audio Input and for independent volume adjustment for every audio channel. It possess 1×Alarm Input and 1×Alarm Output, with optional built-in 24V forced-cut power output for the forced-cut volume controller. It is integrated with standard RJ45 network interface which is accessible to the system when Ethernet is available.

FEATURES

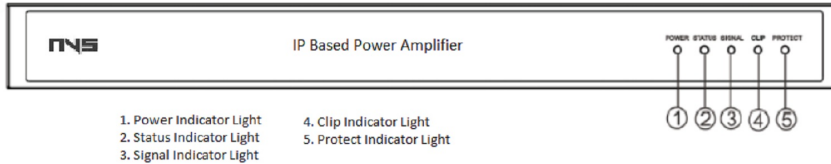

- ⦿ Built-in high-efficiency digital amplifier
- ⦿ 1×Mic Input, 2×Auxiliary Line Input, 1×Network Audio Input
- ⦿ Independent volume adjustment for every audio channel
- ⦿ Built-in complete protection circuit
- ⦿ Integrated with standard RJ45 network interface
- ⦿ Five status indicators (power, status, signal, clipping, protection) display
- ⦿ 100V constant voltage output

Specifications

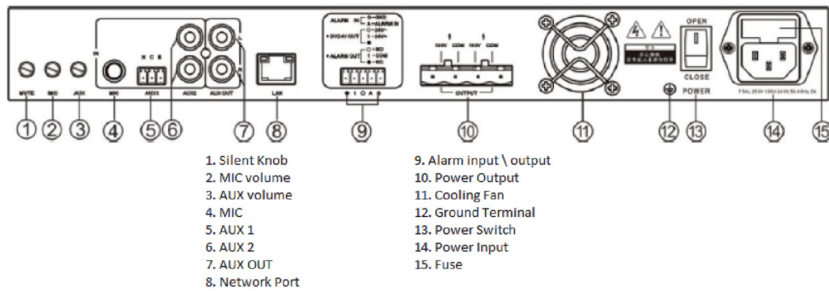

Model	NVS-IP100008AM
Rated Output	360W
Frequency response	60Hz-16kHz
Sensitivity	MIC: -20db AUX:-6db
Operating Temperature	-10 °C - 50 °C
Operating Humidity	≤90%RH non-condensing
Interface	RJ45, MIC, Aux 1\2, Aux out
Audio Codec Protocol	PCM, MP3, ADPCM
Audio sample bit rate	8kHz-44.1kHz
Protocol	IPv4, HTTP, RTP, TCP, UDP, IGMP, ARP, SIP
Audio input	Network, MIC, Aux 1, Aux 2
Power Supply	AC 100V-240V 50/60Hz
Weight	3.45kg
Dimension	430x300x44mm
