

Conference MIC Cable 8-pin

DESCRIPTION

Conference extension cables are mainly used to connect conference microphones to the controller. Usually, the controller will be placed far from the conference table. So, the cable supplied with microphone will not have sufficient length to reach controller. In that scenario, extension cables are helpful.

Specifications	
Model	Length
NVS-DC600005CB	5 meters
NVS-DC600010CB	10 meters
NVS-DC600020CB	20 metrs
