

NVS-30100007MP

Wireless Microphone Receiver

DESCRIPTION

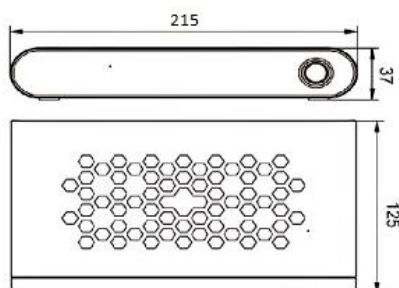

The NVS-30100007MP is a Wireless Microphone receiver, made up of fireproof engineering plastic material. It contains a high-speed voice DSP processing unit is combined with AEC tail-sound elimination technology which makes the voice clear and restored. It is of super noise cancellation and suppression function, which can effectively suppress howling and ensure normal use experience. This product is integrated with personal voice processing chip, which can be connected to active speakers. The treble, bass and volume can be adjusted to meet different environments and can be used for different power settings.

FEATURES

- High-speed voice DSP processing unit is combined with AEC tail-sound elimination technology
- Integrated with professional voice processing clip
- External antenna has strong anti-interference and long transmission distance
- Good voice cancellation and suppression function
- Ring-shaped status indicator
- Fireproof engineering plastic material

Specifications	
Model	NVS-30100007MP
Frequency Response	20Hz~20kHz
Signal to Noise Ratio	≤90dB
Operating Temperature	-10°C~60°C
Operating Humidity	≤90%
Power Consumption	<0.151W
Power Supply	DC 12V/1.5A
Weight	0.3kg
Dimension	215×152×37mm
