

# Boundary Array Microphone with Ceiling Mount Kit

## DESCRIPTION

The NVS-30130008MP is a Ceiling-mounted Boundary Array microphone equipped with a dust-resistant mesh cover. It offers an extended usage time and has a pickup range of 5-8 meters. The microphone has directional broadband directivity, making it suitable for various application scenarios. It can be easily integrated with other Sound-compatible products to fulfill different requirements.

## FEATURES

- ⦿ Protection against elevated temperatures
- ⦿ Wide-ranging directional sensitivity
- ⦿ Protection against excessive load
- ⦿ Effective range for capturing audio: 5 to 8 meters
- ⦿ Protection against excessive current

| Specifications        |                       |
|-----------------------|-----------------------|
| <b>Model</b>          | <b>NVS-30130008MP</b> |
| Microphone Type       | Capacitor Microphone  |
| Frequency Response    | 20-18KHz              |
| Signal to Noise Ratio | 80dB                  |
| Sensitivity           | -10dB                 |
| Number of Microphones | 5                     |
| Channel Separation    | 100dB                 |
| Dynamic Range         | 95dB                  |
| Power Consumption     | 1W                    |
| Power Supply          | 48V phantom power     |
| Maximum Boost Stage   | 113dB SPL@1kHz        |
